

Key Features

This dashboard is filtered using the list of asset.

The histogram visualization displays the average asset price shown as a line with respect the S&P500 price from 1990 to 2019.

Summary

The Asset visual performance dashboard displays information of the performance of a selected asset with respect the S&P500 (top right corner), Nasdaq and Gold Bullion (bottom left corner).

This information allows investors to review the asset's historical returns, bearing in mind that past performance is not indicative of future performance.

Insights are turned on in the visualizations, showing the average value of the asset.
